Summary

As a 20-year-old AI and ML enthusiast, I am passionate about leveraging the power of technology to innovate and solve real-world problems. With a strong foundation in Python, I thrive on building and developing cutting-edge projects that push the boundaries of what's possible.

Currently pursuing my studies in AI and Machine Learning, I am committed to continuous learning and growth. I enjoy exploring new technologies, collaborating on innovative projects, and sharing my knowledge with others. My journey is fueled by curiosity, a drive for excellence, and a desire to make a meaningful impact in the tech industry.

Let's connect and explore opportunities to build, learn, and grow together!

Experience

Sunix AI

Project Intern

August 2024 - December 2024 (5 months)

Bengaluru, Karnataka, India

In my current internship, I am gaining foundational experience in machine learning, with a focus on data labeling, annotation, and dataset management. I am involved in the early stages of machine learning, ensuring accurate data preparation for model training. This role has provided me with essential hands-on experience in the basics of machine learning, including data preprocessing and the management of large datasets crucial for developing machine learning models.

Mukesoftware

Junior Developer (intern)

November 2023 - August 2024 (10 months)

Mumbai, Maharashtra, India

During my internship, I leveraged my computer science background and hands-on experience with various coding languages such as HTML, PHP, JavaScript, and Python. This internship provided me with an excellent opportunity to enhance my skills in web development and backend technologies.

Throughout the program, I focused on practical applications of JavaScript and PHP, while also working extensively with MySQL for database management. Additionally, I gained valuable experience with popular frameworks such as CodeIgniter and Laravel, which streamlined the development of dynamic and scalable web applications.

Furthermore, I worked with WordPress to design and manage content-rich websites, honing my skills in customizing themes and plugins to meet specific project requirements. This hands-on experience allowed me to understand the complete lifecycle of web development, from frontend design to backend functionality.

Education

Tata Institute of Social Sciences

Bachelor of Science - BS, Artificial Intelligence · (July 2023 - July 2026)
